Product Description

As an important component of hotel bathrooms, luxury hotel bath mats should not only focus on slip resistance but also have water absorption and durability.

Our bath towel mats are made of high-quality cotton and high-grade ultra-fine fiber cotton processed and woven. Cotton itself has good water absorption ability and a soft touch. The characteristics of ultrafine fibers are light weight and strong quick drying ability. By combining the two, excellent results can be achieved. In order to solve the anti slip problem of bath mats, we have adopted anti slip bottom layer technology, using food grade silicone anti slip dot matrix, which can firmly adhere to the ground and reduce the risk of sliding. Its safety has passed SGS anti slip testing. We have developed various surface designs such as massage points, mosquito stripes, etc. on its surface, which can reduce the effect of slipping caused by water and increase its appearance. In terms of durability, it can withstand over 3500 stomping tests and 500 machine washing tests, and maintain a shape of over 90%.

Luxury hotel bath mats let quality lead life, you deserve to have exclusive bath mats with you !
